# What key changes have been made to ASA 250 Consideration of Laws and Regulations in the Audit of a Financial Report?

The AUASB made limited amendments to ASA 250 in order to address potential inconsistencies in relation to the approach when identifying and dealing with instances of identified or suspected NOCLAR. Changes have been made to:

- Align aspects of ASA 250 to the amended APES 110 Code of Ethics for Professional Accountants
- **Clarify** the requirement regarding the auditor's determination of whether to report identified or suspected NOCLAR to an appropriate authority outside the entity and the auditor's duty of confidentiality
- **Highlight** that the auditor may have additional responsibilities under law, regulation or relevant ethical requirements
- Enhance the consideration of the implications of NOCLAR on the audit
- **Emphasize** the fact that, in certain cases, communication with management or those charged with governance may be restricted or prohibited by law or regulation

# What key changes have been made to ASA 250 Consideration of Laws and Regulations in the Audit of a Financial Report?

ASA 250 sets out specific expectations for auditors in relation to NOCLAR and differentiates between two types of laws and regulations as follows:

- (a) Laws and regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements; and
- (b) Other laws and regulations that do not have a direct effect on the determination of the amounts and disclosures in the financial statements, but compliance with which may be fundamental to the operating aspects of the business, to an entity's ability to continue its business, or to avoid material penalties; non-compliance with such laws and regulations may therefore have a material effect on the financial statements.

For category (a), the auditor is required to obtain sufficient appropriate audit evidence regarding compliance with the provisions of those laws and regulations.

For category (b), the auditor's responsibility is limited to undertaking specified audit procedures to help identify non-compliance with those laws and regulations.
